Sumy 20 20

LETTER OF APPROVAL
Educational and professional program

Vice-rector for scientific and pedagogical and educational work, Ph.D., prof.	Zhmailov V.
Head of the educational department	Kolodnenko N.
Dean of the Faculty of Food Technologies	Radchyk O.
Guarantor of the educational program, Dr. Tech. Sciences, Professor.	Pertsevov F.,
Member of the project team, Ph.D., Associate Professor.	Melnyk O.
Member of the project team, Ph.D., Associate Professor.	Nazarenko Y.
Member of the project team, Ph.D., Associate Professor.	Bolgova N.
Member of the project team, Ph.D., Associate Professor.	Sabadash S.
Member of the project team, Ph.D., Associate Professor.	Savchenko-Pererva M.
Director of Culinary Studio "OK"	Krasnopolova O.

FOREWORD

Developed by a working group consisting of:

Pertsevov F., Dr. Tech. Sciences, Professor, Head Department of Technology food;

Melnyk O., Ph.D., Associate Professor of the department of Food Technology;

Nazarenko Y., Ph.D., Associate Professor of the department of Milk and Meat Technology;

Bolgova N., Ph.D., Associate Professor of the department of Milk and Meat Technology;

Sabadash S., Ph.D., Associate Professor of the department of Engineering Technologies of Food Production;

Savchenko-Pererva M., Ph.D., Associate Professor of the department of Engineering Technologies of Food Production.

Reviewers:

1. Kondrakova G., HR Director of Globinsky Meat Processing Plant.
2. Panasyuk O., Chief Technologist of PJSC Myronivsky Hliboproduct.
3. Krasnopolova O., Director of Culinary Studio "MC".

1. Profile of the educational program «Food technologies» specialty 181 «Food Technologies»

1 - General information	
Full name of the higher educational institution and structural subdivision	Sumy National Agrarian University Faculty of Food Technology
Higher education degree and title of qualification in the original language	Degree of higher education - master. Qualification - Master of Food Technology
The official name of the educational program	Food technology
Type of diploma and scope of educational program	Diploma Master, a single, 90 ECTS credits term of study 1 year 4 months
Availability of accreditation	
Cycle / level	of NQR Ukraine - level 7 , FQ-EHEA - the second cycle, QF-LLL - level 7
Prerequisites	Availability of a bachelor's degree in food technology or a bachelor's degree , specialist, master's degree in another educational program
Language of instruction	Ukrainian, English
Term of the educational program	2 years
Internet address of the permanent placement of the description of the educational program	https://fht.snau.edu.ua/metodichna-robota/osvitnij-riven-magistr/osvitni-programi/
2 - The purpose of the educational program	
Training of highly qualified, competitive specialists in the field of production and technologies with high social and personal qualities and the ability to conduct research and professionally solve professional problems at the enterprises of the industry and restaurants.	
3 - Characteristics of the educational program	
Subject area (field of knowledge, specialty, specialization (if available))	18 Production and technology 181 " Food Technology "

Orientation of the educational program	Educational and professional
Objectives of the program	Formation of special skills and knowledge that provide students with research skills using a set of research and innovation, organizational, technological and marketing methods, techniques and technologies to improve the functioning and development of food enterprises and organizations in the industry.
The main focus of the educational program and specialization	EPP provides the development of masters' skills in solving problems in the industry, planning and conducting research on the development and improvement of technologies for food and culinary products, analysis of the results and implementation of developments in food companies.
Features of the program	<ol style="list-style-type: none"> 1. Formation of professional competencies with the help of theoretical and methodological and applied issues of the food industry; 2. Possession of skills of a choice of research methods, modification of existing and development of new, proceeding from the set tasks; 3. Ability to build models of systems and processes, use modern optimization programs in a particular field of knowledge; 4. Ability to apply modern methods of experimental research, the ability to plan an experiment and process the results, analyze and interpret them, draw conclusions. Ability to draw up the results in the form of reports, abstracts, articles, reports. Some experience in conducting patent research and registration of application materials for intellectual property; 5. Possession of methods of organization and control of the appropriate level of quality and safety of food products, environmental safety and resource conservation of technological processes of production; 6. Execution of research works related to the study of technological processes, introduction of new and improvement of existing technologies for the production of food and culinary products at food enterprises and restaurants; 7. Development of a business plan for an innovative project.
4 - Suitability of graduates for employment and further study	

Suitability for employment	<p>Graduates are able to perform professional work in various linear and functional divisions of organizations of all forms of ownership and organizational and legal forms, as well as educational, scientific, consulting, consulting, design and design organizations and institutions; subdivisions of state and municipal administration bodies in accordance with the National Classification of Ukraine "Classification of Professions" SC 003: 2010:</p> <p>1222.1 Chief specialists - managers and technical managers of production units in industry 1222.2 Chiefs (other managers) and masters of production sites (divisions) in industry 2149 Professionals in other fields of engineering case 2310 Teachers of universities and higher educational institutions 2320 Teachers of secondary schools 2359 Other training professionals 2471 Quality control professionals 2482 Professionals in the hotel and restaurant business</p> <p>In addition, the master's level involves the professional activities of graduates in the positions of head of the technological laboratory, head of the sanitary-technological laboratory, laboratory engineer, design engineer, chief project technologist, chief administrator, head of the research unit.</p>
Further training	<p>Graduates have the right to continue their studies at the third educational and scientific level of higher education "Doctor of Philosophy" to acquire additional qualifications in the system of postgraduate education.</p>
5 - Teaching and assessment	
Teaching and learning	<p>- student-centered learning, self-study, problem-oriented learning, individual-creative and competence, system-functional approach;</p> <p>- lectures, laboratory work, seminars, practical classes in small groups, independent work on the basis of textbooks and abstracts, consultations with teachers, preparation of qualifying thesis (on the recommendation of the head of the educational program)</p>
Assessment	<p>Assessment of the quality of mastering the educational-professional program includes an accumulative point-rating system, which provides for the assessment of students for all types of classroom and extracurricular learning activities aimed at obtaining program learning</p>

	outcomes: input, current, phased, modular, final control, exams, testing, credit for research practice. Execution of term papers / projects, final certification - public defense of the qualification work or state qualification exam.
6 - Program competencies	
Integral competence (IC)	Ability to solve complex problems and problems in food technology in professional activities and / or in the learning process, which involves research and / or innovation and is characterized by uncertainty of conditions and requirements.
General competence (GC)	GC 1. Ability to search, process and analyze information from various sources. GC 2. Ability to conduct research at the appropriate level. GC 3. Ability to generate new ideas (creativity). GC 4. Ability to show initiative and ingenuity. GC 5. Ability to act socially responsibly and consciously. GC 6. Ability to work in an international context.
Professional competencies of the specialty (PC)	PC 1. The ability to plan and carry out research using modern the equipment, methods and specialized software in terms of teaching, research and / or production laboratories. PC 2. Ability to apply mathematical methods and models in applied research, optimize technological processes for the development of innovative technological solutions in food production. PC 3. Ability to develop new generation food products, including functional ones, based on the principles of food combinatorics and the use of safe, biologically complete raw materials and innovative ingredients, the ability to innovate scientific activities that promote the development of new knowledge in food technology. PC 4. Ability to organize production and practically implement scientific developments taking into account energy efficiency and resource conservation and improvement of food quality. PC 5. Ability to develop and implement commercial and scientific and technical projects in the field of food technology, taking into account technical, commercial, legal and labor protection and environmental issues. PC 6. Ability to protect intellectual property in the field of food technology

	<p>PC 7. Ability to organize a system of quality control and safety of food raw materials, semi-finished products and food products.</p> <p>PC 8. The ability to predict the further development of the food industry in the context of globalization of economic development of society.</p> <p>PC 9. Ability to develop programs for the development and effective functioning of the food industry and restaurants, including in the context of foreign economic relations.</p> <p>PC 10. Ability to formulate and implement their own models of professional activity in the field of food technologies.</p> <p>PC 11. Ability to interpret the obtained data, prepare scientific reports, prepare scientific publications, present and discuss the results of research and design decisions, including in a foreign language, at scientific seminars and conferences on the development of food technology.</p>
--	--

7 - Program learning outcomes (PLO)

	<p>PLO 1. Find, systematize and analyze the necessary information in the scientific and technical literature, electronic databases and other sources of information at the stage of choosing a problem or research topic.</p> <p>PLO 2. To have an information and communication base for the development and implementation of innovations, taking into account the basics of economics, marketing and management.</p> <p>PLO 3. Demonstrate initiative and ingenuity in the development and implementation of technical and technological innovations. Be able to independently make non-standard creative decisions, take responsibility for them, generate new ideas and implement them in practice, demonstrate the ability to adapt.</p> <p>PLO 4. Organize the work of food industry enterprises and restaurants in accordance with the requirements of life safety, resource conservation and environmental safety.</p> <p>PLO 5. Outline the psychological patterns of development, as well as pedagogical tools for the formation of personality in professional activities.</p> <p>PLO 6. Apply special equipment, modern software, methods and techniques that are acceptable in certain areas of food technology, when performing research in training, research and production laboratories.</p> <p>PLO 7. Select and apply the most suitable methods of mathematical modeling and optimization in the development of scientific and technical projects in the field of food technology.</p> <p>PLO 8. Know and apply the basic principles of obtaining innovative food products from different types of raw materials, taking into account the social and economic efficiency of scientific development.</p>
--	---

PLO 9. Plan and manage innovative research projects of fundamental and applied direction taking into account the current state of science and technology in food technology, conduct research, analyze the results and draw conclusions.

PLO 10. Use professional knowledge in the field of food quality and safety management for the development and implementation of quality management systems and HACCP and ISO product safety.

PLO 11. Analyze and take into account in practice the trends of scientific and technical development of food science, choose the most promising and rational areas of scientific and technical activities.

PLO 12. Develop programs for the development and operation of enterprises in the industry, implement rational methods of managing production processes, plan the need for resources. To form and implement own models of professional activity taking into account the best experience of the organization of scientific and industrial activity.

PLO 13. Develop and improve food production technologies, design food warehouses, develop technologies for storage and canning of semi-finished and finished products.

PLO 14. Objectively and critically evaluate vital social information, make a significant contribution to the harmonization of human relations, work effectively, both individually and as a team.

PLO 15. Analyze and formalize the results of scientific and production tests in the form of scientific and technical documentation, scientific reports, security documents, articles, abstracts of scientific conferences.

PLO 16. Have practical skills of business professional communication in Ukrainian and one of the foreign languages, be able to logically formulate opinions, present the results of their own scientific and practical activities.

Unique

PLO 17. Develop and implement innovative technological solutions to solve existing problems and further development of food technology, reproduce the results of research and testing in the production environment of real enterprises, develop foreign economic relations of food industry and restaurants.

PLO 18. Demonstrate knowledge and skills on waste-free technologies in the existing food industry and restaurants, the use of new methods of canning and storage of food, the use of bioplastics for packaging raw materials, semi-finished and finished products.

8 - Resource support for program implementation

Staffing	The presence of a support group, professional development of scientific and pedagogical workers, ensuring compliance with the scientific degree or academic title of scientific and pedagogical worker a.
Logistics	Availability of the library; Laboratories: "Interdepartmental Scientific and Practical Laboratory of Chemical and Microbiological Research of Food", "Educational and Scientific Laboratory of Innovative Technologies and Food Safety and Quality",

	"Educational and Scientific Laboratory of Food Production Equipment ", "Educational and Scientific Laboratory of Designing New Types of Food products "," Training Laboratory of Food Technology "and offices; sports complex; food factory; computer classes; dormitory; medical point .
Information and educational and methodical support	Availability of methodical support of practical, seminar, laboratory works, tasks for independent work of students, questions for current and final control. Methodical support of course works. Provision of programs for internships. Availability of reading rooms, textboMCs, manuals, professional periodicals.
9 - Academic mobility	
National credit mobility	Agreement on cooperation in science and education between Sumy National Agrarian University and Kharkiv State University of Food and Trade (2018-2023), Agreement on scientific and technical cooperation with the Institute of Applied Physics, National Academy of Sciences of Ukraine (2020-2025).
International credit mobility	Agreement on joint postgraduate training with Hezhou University, China (May 21, 2019), Agreement on joint postgraduate training with Zhejiang University of Agriculture and Forestry, China (April 27, 2020), Agreement with Guizhou University (UG), China (November 25, 2020).
Studing of foreign applicants for higher education	It is possible to teach foreign citizens with the prior study of English by the student.

2. The list of components of the educational-professional program and their logical sequence

2.1. List of EP components

Code / s	Components of the educational program (academic disciplines, course projects (works), practices, qualification work)	Number of credits	Form of final control
1	2	3	4
Mandatory components of the EP			
MC1	Business foreign language (Ukrainian)	5,0	Exam
MC2	Personnel management and innovative development of enterprises	5,0	Differentiated offset
MC3	Information technologies and optimization of technical and technological objects of the processing industry	5,0	Exam
MC4	Innovative Engineering of Restaurant Business, term paper	5,0	Exam, public defense of term paper before the commission
MC5	Food quality management	5,0	Exam
MC6	Research practice	5,0	Differentiated offset
MC7	Qualification thesis	10,0	Exam, public defense of term paper before the commission
Uniqueness of EP			
MC8	Scientific research work	10,0	Exam
MC9	Innovative technologies in enterprises of the industry	10,0	Exam, public defense of term paper before the commission
MC10	Scientific bases of waste-free technologies of food industry	5,0	Differentiated offset
The total amount of mandatory components:		65 credits ECTS	
Selective components of EP			
<i>Discipline chosen by the Institution of Higher Education</i>			
SK1	Elective discipline 1	5,0	Differentiated offset

<i>Disciplines of scientific and professional orientation at the choice of the applicant</i>			
SC2	Elective discipline 2	5,0	Differentiated offset
SC3	Elective discipline 3	5,0	Exam
SC4	Elective discipline 4	5,0	Differentiated offset
SC5	Elective discipline 5	5,0	Exam
The total amount of sample components:		25 credits ECTS	
TOTAL VOLUME OF EDUCATIONAL PROGRAMS		90 credits ECTS	

2.2. Structural and logical scheme of EP

A brief description of the logical sequence of studying the components of the educational program

Code e / s	Components of the educational program (academic disciplines, course projects (works), practices, qualification work)	Semester		
		1	2	3
Mandatory components of the EP				
MC1	Business foreign language (Ukrainian)	*

SC1	Elective discipline 1			*
<i>Disciplines of scientific and professional orientation at the choice of the applicant</i>				
SC2	Elective discipline 2		*	
SC3	Elective discipline 2		*	
SC4	Elective discipline 2			*
SC5	Elective discipline 2		*	

* According to the Law of Ukraine "On Higher Education", students have the right to choose disciplines within the limits provided by the relevant educational program and working curriculum, in the amount of not less than 25 percent of the total number of ECTS credits provided for this level. education. At the same time, applicants of a certain level of higher education have the right to choose disciplines offered for other levels of higher education, in agreement with the head of the relevant faculty or department. " Elective disciplines can be formed into blocks, then the student selects a block of disciplines, after which all disciplines of the block become mandatory for study. It is recommended to use both block forms of choice and completely free choice of disciplines by students.

3. Form of certification of applicants for higher education

Attestation of graduates in the educational- professional program "Food Technology" of the second (master's) level is carried out in the form of defense of a master's thesis and ends with the issuance of a standard document on awarding a master's degree with a master's degree. Defense is carried out openly and publicly at a meeting of the Examination Commission.

4. Matrix of correspondence of program competences to components of the educational program
